Fund Manager comments

Echiquier Arty SRI A turned in a negative monthly performance of -2.38% and of -10.80% year-to-date.

The year ended on a negative note, with the value style continuing to outperform. BNP and CREDIT AGRICOLE banks are back on the rise, driven by a new rise in interest rates, as evidenced by the German 10-year bond, which has touched the 2.5% mark, remembering that it was negative just one year ago! In this context, so-called technology companies are suffering more from the inflationary environment, especially on the other side of the Atlantic where most of our positions have had difficult performances, such as AMAZON, WALT DISNEY and MICROSOFT. The quality of the results of these companies does not make them immune to such a violent rate hike phase.

We end the year with an equity allocation of less than 25% and vigilance is still required in stock selection in 2023, especially on the basis of valuation. On the other hand, several opportunities are emerging on the bond side, yields are back and now offer a positive basis for performance that we have not seen for many years.
