Fund Manager comments

Echiquier Robotics A turned in a positive monthly performance of 2.37% and of 14.89% year-to-date.

We ended the quarter well ahead of our benchmark index. However, the month was more challenging, with cyclical sectors such as energy and commodities outperforming. In March, it was Asian stocks that stood out, with a sharp rise in Chinese company CATL, a leader in the manufacture of electric batteries. The company benefited from positive comments from analysts, who revised its growth prospects upwards and pointed to its attractive valuation. HIWIN, Taiwan's leading manufacturer of linear guides, published results indicating that the sector is expected to recover in the second half of the year. Finally, NVIDIA, the leader in accelerators for Artificial Intelligence algorithms, continued to build on its good momentum with the announcement of its new generation of graphics cards for data centres. On the other side of the spectrum, BE SEMICONDUCTOR suffered from rumours that the standards for high-bandwidth memory, used in particular by NVIDIA, have been relaxed and would delay the penetration of the company's latest-generation tools.
