Lower risk

Highest risk

This indicator represents the risk profile shown in the KID. The risk indicator is based on the assumption that you hold units for 5 years. Warning: the real risk can be very different if you opt for an exit before this period, and you could get less in return.

Recommended investment horizon

5 years

Fund Manager comments

Echiquier Arty SRI Fund I turned in a negative monthly performance of -0.14% and turned in a positive performance of 3.70% year-to-date.

3rd consecutive month of falling equity markets against a backdrop of geopolitical tension. Corporate earnings are an important issue in the final stretch of the year, and we are seeing that mistakes in both communications and earnings are being punished very harshly. Conversely, good publications are greeted with more restraint. Given the excess volatility on the equity markets, Echiquier Arty SRI's positioning favours bonds (around 75% of the fund), which continue to offer very attractive returns. This is why the portfolio's duration is regularly adjusted upwards whenever an opportunity arises on the primary market. Echiquier Arty SRI is holding up well in this environment, with bonds rising, equities outperforming their index and hedging in place to limit the downside. We gradually reduce the hedge when the Eurostoxx approaches the 4,000-point mark.

Fund Managers: Olivier de Berranger, Guillaume Jourdan, Uriel Saragusti
