Fund Manager comments

Echiquier Artificial Intelligence M turned in a negative monthly performance of -1.44% and turned in a positive performance of 7.62% year-to-date.

Investors are wondering about the trajectory of inflation and whether the US Federal Reserve (Fed) will raise its key interest rates. This has consigned fundamental analysis to the background as we see a number of very encouraging signals about the state of companies in the portfolio. Their high growth in 2020 and ability to innovate make their future growth trajectory very exciting relative to other sectors that will experience a significant slowdown in 2022 and 2023. The fund outperformed its benchmark in September, benefiting from the rise of US company AFFIRM. We have mentioned this company in the past along with its competitor AFTERPAY, who are both leaders in the emerging "buy now pay later" sector. This industry is booming as new generations move away from credit cards and turn to other financing solutions. AFFIRM continues to see strong use of its platform, and commercial partnerships with companies such as AMAZON, SHOPIFY and WALMART have multiplied.
