## Fund Manager comments

Echiquier Space B turned in a negative monthly performance of -3.12% and turned in a positive performance of 25.68% year-to-date.

During the summer break, the equity market experienced its second negative month since the start of the year. This was particularly challenging for the fund, given the rise in US long-term interest rates since mid-July, which has had a negative impact on our growth style. In August, we benefited from the rise in Canadian MDA, which announced that it had won the contract to produce the satellites for Telesat's Lightspeed constellation. This change of supplier, from Thales Alenia to MDA, demonstrates our vision of the rise in competitiveness of new-generation space suppliers. In addition, Asian satellite TV and connectivity provider SKY PERFECT JSAT rose on the back of a robust publication showing the need for satellite providers in Japan and South-East Asia to guarantee connectivity for populations living outside the major metropolises. On the other hand, the fund suffered from sharp falls in the smaller stocks in the portfolio, such as BLACKSKY, VELOD3D and 3D SYSTEMS, which reacted negatively to fears about inflation and rising US long-term interest rates.
