Fund Manager comments

Echiquier World Equity Growth I turned in a negative monthly performance of -0.39% and turned in a positive performance of 4.87% year-to-date.

February continued a pattern seen in markets since the market peaked in late 2021, where interest rates determine stock market direction. When growth and inflation appear to be slowing, interest rates fall and stocks go up, as they did in January. When interest rates head up, long duration technology and growth stocks suffer, as it was the case since the strong job report on February 3rd. Included among the worst performers of the month were ALPHABET, AMAZON, TAIWAN SEMICONDUCTOR and ASML. The best performers were found in defensive areas such as health care, like ASTRAZENACA and STRYKER, as well as beverage maker DIAGEO and convenience store operator FEMSA. There were no significant changes within the fund during the month other than reducing our position in WALT DISNEY following a well-received earnings report. We continue to focus on those companies providing steady growth at a reasonable valuation through these turbulent times.
