Fund Manager comments

Echiquier Positive Impact Europe G turned in a positive monthly performance of 1.51% and of 8.09% year-to-date.

In April, the fund underperformed its index, penalised by the correction in tech and semiconductors and by the outperformance of discounted sectors such as financials, real estate and energy, the latter two of which were absent from the portfolio. Among the main contributors, our defensive exposures such as L'OREAL and AIR LIQUIDE reported excellent results and ALLIANZ held up well in the face of the rotation towards value. Conversely, semiconductors were penalised by mixed results and fears of cuts in capex, affecting ASML, INFINEON and SOITEC. SARTORIUS STEDIM BIOTECH reported disappointing results due to continued customer de-stocking. During the month, we initiated a line in COLOPLAST, a Danish specialist in medical devices to improve the lives of patients suffering from physical alterations following an ostomy in particular. We are divesting ACCIONA ENERGIA due to the difficulties of renewable energies with rising interest rates and falling energy prices and more particularly in Spain where the company is incorporated, due to the renewed interest at the end of April of the government in new taxes on the sector.

Solutions Score: This dimension scores the contribution of a company in terms of revenue from its products and services that address any of the nine business-oriented SDGs, as defined by La Financière de l'Echiquier's methodology 5 points = 10% of sales contributing to SDGs.

Initiatives score: This dimension scores a company on the significant initiatives it implements that contribute towards the SDGs. Points are attributable for different initiatives across all seventeen SDGs, such as investment in research, tiered product pricing for lower income customers or recycling initiatives.

SDGs score: Solutions score + Initiatives score
