Fund Manager comments

Echiquier Agenor SRI Mid Cap Europe Fund B turned in a positive monthly performance of 2.98% and of 3.65% year-to-date.

Equity markets are rising, buoyed by solid macroeconomic data in the United States and the gradual rebound in leading indicators in Europe. Value themes, particularly financials, outperformed significantly as expectations of interest-rate cuts eased in the face of a more resilient macro environment than expected. The fund limited its underperformance, thanks to NEOEN (+50bp), which indirectly benefited from KKR's takeover bid for Encavis, bringing high valuation multiples to the fore. IMCD and SPIE (both up 40bp) were buoyed by a good operating performance and persistently attractive valuations. DIPLOMA (+35bp) made a good acquisition in the United States, with a significant immediate accretion. BE SEMI, the only significant negative contributor (-46bp), is said to be affected by a change in specifications for memory chips, which would delay the adoption of Hybrid Bonding technology. In March, we exited a number of underweighted stocks whose operational performance did not match our expectations (CRODA, UNIBREW and REMY COINTREAU). We continued to increase our position in ALKABELLO and initiated a position in PANDORA, whose growth prospects seem to us to be undervalued by the market.
