Max. drawdown of the benchmark	-7.5	-16.9	-33.8
Time to recovery (business days)	23.0	-	-

Lower risk — Highest risk

1 2 3 4 5 **6** 7

This indicator represents the risk profile shown in the KID.
The risk indicator is based on the assumption that you hold units for 5 years.
Warning: the real risk can be very different if you opt for an exit before this period, and you could get less in return.

**Recommended investment horizon** — 5 years

Fund Manager comments

Echiquier Artificial Intelligence B turned in a negative monthly performance of -1.27% and turned in a positive performance of 12.47% year-to-date.

We ended the quarter well ahead of our benchmark index. March, on the other hand, was a tougher month, with cyclical sectors such as energy and commodities outperforming. By contrast, growth stocks, and in particular those in the software sector, lagged behind. The second wave of AI adoption will come from the software sector, with companies starting to monetise their new generative AI modules. However, the market has had to adjust to the fact that this monetisation will be gradual throughout the year and stronger in 2025 and beyond. At SNOWFLAKE, a leading cloud data management company, we were surprised to learn of the departure of CEO Frank Slootman, who is making way for technology expert Sridhar Ramaswamy. This is a good example of the importance of aligning corporate governance in the era of generative AI, where the nascent market requires a stronger affinity with this cutting-edge technology. Finally, NVIDIA, the fund's top performer, continues to outperform thanks to the announcement of its new generation of accelerators.
