5 years

Fund Manager comments

Echiquier Artificial Intelligence B USD turned in a positive monthly performance of 7.83% and of 11.50% year-to-date.

The rise of Artificial Intelligence (AI) continues, enabling us to end the month outperforming our benchmark index. NVIDIA's thundering results in February gave investors renewed enthusiasm. Not only is investment in AI continuing, but the applications are multiplying and starting to generate tangible returns for the companies that are adopting it. This is the case for PALANTIR, which has seen its growth accelerate in its commercial activity in the United States as demand for its AI platform is so high. CONFLUENT, a leader in data streaming technologies, has also reported very good results as its customers develop AI applications requiring real-time data flow. By contrast, ALPHABET suffered a sharp fall after the disappointing launch of its Gemini AI product, which was impacted by controversial decisions made in its algorithm. The company's CEO was even forced to apologise. We hope that this episode will enable ALPHABET to better exploit its AI potential. The AI revolution is gathering pace and we're excited about what's to come!
