## Fund Managers

Stéphane Nières Tavernier, Yann Giordmaina

## Characteristics

Type	French mutual fund (FCP)
Lifetime	99 years
Inception date	06/22/2005
Date of 1st NAV	06/22/2005
ISIN	FR0010546945
Bloomberg code	ITHAQUC FP
Base currency	EUR
Income allocation	Accumulation
Ref. Indic.	STOXX EUROPE 600 NR
SFDR classification	Article 8

## Financial information

Entry charge	4% max. not acquired by the fund
Exit charge	1% max.
Management fees	1.99% incl. taxes
Performance fee	No
Swing pricing	No
Min. subscription	1 EUR

## Fees as of 06/30/2023

Management fees and other administrative and operating expenses	2.057%
Transaction costs	None
Outperformance fees	No

## Operational information

Valorisation frequency	Daily
Cut off	14:30
Settlement	D+2
Fund administrator	CACEIS Fund Administration
Custodian	CACEIS Bank
Decimalisation	Ten-thousandths

## Fund Manager comments

Tocqueville Megatrends ISR C turned in a negative monthly performance of -1.55% and turned in a positive performance of 5.78% year-to-date.

First month of decline for the European market since last October. The combination of first-quarter publications and central bank deadlines brought the rebound to a halt. Growth stocks fared less well than value stocks. The fund underperformed its benchmark index in April. This was mainly due to its bias towards Growth stocks: too much defensive Chemicals, absence of Mining, underweight Energy, and consolidation of the heavily overweighted Technology sector. The most notable monthly performers were AstraZeneca and Adidas, whose good results were hailed. In the Technology sector, Infineon benefited from comments from STM (and Texas Instruments) that it had reached a low point in the Automotive/Industrial sector. Among the disappointments: disappointing results and orders from Kion, a downward revision of growth at OVH which led to a very sharp fall in the share price, and further problems at Edenred's Italian subsidiary. In contrast to previous months, aerospace/defence stocks were under pressure (Leonardo, Thales and Airbus).

## Evolution of the performance of the fund and its reference indicator since inception (base 100)

Ref. Indic.: source Bloomberg

## Perf. (%)

	1 month	YTD	1 year	3 Years	5 Years	10 years	Since inception
Fund	-1.6	+5.8	+8.3	-0.5	+4.7	+5.6	+3.8
Ref. Indic.	-1.0	+6.6	+11.1	+7.4	+7.8	+6.8	+5.9

## Performance by calendar year (%)

Until the 01/13/2013, the reference index was MSCI EUROPE NR. And since the 01/14/2013, STOXX EUROPE 600 NR.

## Other risk indicators

(based on weekly figures)	1 year	3 Years	5 Years	10 years	Since inception
Fund volatility	12.1	15.4	18.3	16.2	17.9

Time to recovery (business days)	59.0	-	187.0	187.0	1530.0

## Risk indicator

The synthetic risk indicator shows the level of risk of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified the product in risk class 4 out of 7, which is a low to medium risk class. In other words, the potential losses associated with the future performance of the product are low to medium and, if the situation were to deteriorate on the financial markets, it is unlikely that our ability to pay you would be affected.

This indicator represents the risk profile shown in the KID. The risk indicator assumes that you hold the share for 5 years. Warning: the real risk may be very different if you opt to exit before that time, and you may get less in return.

Important risk(s) for the fund not taken into account in this indicator: credit risk, liquidity risk, counterparty risk, guarantees. The risk category associated with this fund is not guaranteed and may change over time.

Key SRI indicators

Méthode de l'exclusion

Exclusion from the investment universe of 20% of the lowest rated companies/issuers, and from the list of exclusions issued by the LBP AM Exclusion Committee.

**Responsible governance**

Encourage the dissemination of best practices in terms of corporate governance and business ethics.

**Sustainable Resource Management**

Sustainable management of human and natural resources: respect for human rights, development of labour laws, sustainable relations with suppliers, environmental protection.

**Energy Transition**

Mitigating climate risks by supporting the transition from a high-carbon economic model to a more sober and sustainable model.

**Territorial Development**

Promote responsible practices that meet the Sustainable Development Goals and create value for all stakeholders in the value chain.

SRI Indicators	% couverture portefeuille	% couverture comparable	Portfolio value	Valeur limite du comparable	Type de comparable
Max GREaT score	100.0%	85.3%	5.6	6.2	Portfolio -20%

Glossary

Lexicon of risk indicators	
Volatility	Measure of the amplitude of variations in the price of a share, a market or a fund. It is calculated over a given period and is used to assess the regularity of the performance of a share, market or fund.
Sharpe ratio	Indicator of the (marginal) return obtained per unit of risk taken. If the ratio is negative: less profitability than the benchmark. If the ratio is between 0 and 1: outperformance with too much" risk taken.
Bêta	If the ratio is greater than 1: outperformance that does not come at the cost of "too much" risk."Indicator which corresponds to the fund's sensitivity in relation to its benchmark index. For a beta of less than 1, the fund is likely to fall less than its index; if the beta is greater than 1, the fund is likely to fall more than its index.
Information ratio	Synthetic indicator of the effectiveness of the risk/return trade-off. A high indicator means that the fund regularly outperforms its benchmark index.
Tracking error	An indicator that compares the fund's volatility with that of its benchmark index. The higher the tracking error, the further the fund's average performance is from its benchmark index.
Max. drawdown	Max drawdown measures the biggest fall in the value of a portfolio.
Time to recovery (business days)	Recovery time, which corresponds to the time needed for the portfolio to return to its highest level (before the "max drawdown").
Sensitivity	Variation in the value of an asset when another factor varies at the same time. For example, the interest-rate sensitivity of a bond corresponds to the variation in its price caused by a rise or fall in interest rates of one basis point (0.01%).

Lexicon of financial analysis	
EV/Sales	Enterprise valuation ratio: enterprise value/sales.
PER	Company valuation ratio: Price Earning Ratio = market capitalisation/net profit.
Consumer discretionary	In contrast to basic consumption, it represents all goods and services considered non-essential.
Basic consumption	As opposed to discretionary consumption, it represents goods and services considered essential.
Communication Services	This sector includes telecoms network operators and providers of communications and data transmission services.
Emerging countries	Emerging countries are countries whose economic situation is in the process of development. This growth is calculated on the basis of GDP, new businesses and infrastructure, and the standard of living and quality of life of the inhabitants.
Commodities	A natural resource used in the production of semi-finished or finished products, or as a source of energy.

Lexicon of credit analysis	
Investment grade bond	A bond is said to be "investment grade", i.e. if its financial rating by the rating agencies is higher than BB+.
High yield bond	A high-yield bond is one rated below BBB- by the rating agencies.
Duration	The average life of its cash flows weighted by their present value. All other things being equal, the higher the duration, the greater the risk.
Yield to worst	The worst return a bond can achieve without the issuer defaulting.
Yield (all calls exercised)	The yield on a bond includes any call dates incorporated into the bond. These "call" dates correspond to intermediate maturities which give the possibility of redeeming the bond before its final maturity date.

Non-financial analysis lexicon	
Selectivity rate	Selectivity rate: percentage of the initial universe excluded for ESG reasons.
Investment universe	Investment universe ("investible universe") meeting the constraints of the prospectus.
Controversy score	This controversy score ranging from 0 to 10 (0 being the worst) is provided to us by MSCI ESG Research. We want to measure whether the companies invested in our UCIs are better than those in their benchmark index in terms of management and occurrence of ESG controversies on themes such as the environment, consumer rights, human rights, labour rights, supplier management as well as governance.
Carbon data	A set of raw data (source Carbon4 Finance) used to calculate the various ratios linked to the fund's carbon footprint: Carbon impact ratio: CO <sub>2</sub> emissions saved and CO <sub>2</sub> emissions induced. Carbon intensity: Scope 1, 2 and 3 carbon emissions (scope 1 represents direct emissions, 2 indirect energy-related emissions, 3 all other indirect emissions).
Carbon Impact Ratio (CIR)	Emissions saved to emissions induced ratio calculated by Carbon4 Finance, which corresponds to the ratio between GHG emissions avoided and GHG emissions induced by a company (in tonnes of CO <sub>2</sub> equivalent), known as the CIR. The higher the CIR, the more relevant the company is to the transition to a low-carbon economy. This indicator enables us to assess the relevance of a company's activity to the challenges of combating climate change. For a given company, a CIR greater than 1 means that the activity avoids more greenhouse gas emissions than it induces.
Weighted average carbon intensity (WACI)	Carbon intensity is the weighted average of our UCIs (compared with their benchmark index) using Carbon4 Finance's WACI (Weighted Average Carbon Intensity) methodology. The calculation formula is given in the ESG methodology insert.

For more information

This document, which is of a commercial nature, is above all a monthly report on the management and risks of the sub-fund. It is also intended to provide you with simplified information on the characteristics of the sub-fund.

For further information on the characteristics and costs of this sub-fund, we invite you to read the regulatory documents (prospectus available in English and French and DIC in the official languages of your country) available free of charge on our website [www.lfde.com](http://www.lfde.com).

Investors or potential investors are informed that they can obtain a summary of their rights in the official language of their country or in English on the Regulatory Information page of the management company's website [www.lfde.com](http://www.lfde.com) or directly via the link below:  
<https://cdn.lfde.com/upload/partner/Droitsdelinvestisseur.pdf>

Information on withholding tax rates: for distribution units, dividends paid are taxed at 30%. For capitalization units of funds investing more than 10% of their net assets in debt securities, taxation at 30% on income derived directly or indirectly from the yield on debt securities.

Investors or potential investors may also file a claim in accordance with the procedure laid down by the management company. This information is available in the official language of the country or in English on the Regulatory Information page of the management company's website [www.lfde.com](http://www.lfde.com) or directly via the link below:  
<https://cdn.lfde.com/upload/partner/Droitsdelinvestisseur.pdf>

Finally, the investor's attention is drawn to the fact that the manager or the management company may decide to terminate the marketing agreements for its collective investment schemes in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU.
