Fund Manager comments

Echiquier Go Local B turned in a negative monthly performance of -0.01%.

The start of the year was marked by significant volatility: the first few days were characterised by a fall, attributed to profit-taking. The market quickly resumed its uptrend, driven mainly by a handful of stocks, the 'Super 7s', which led to several all-time highs. The dynamic changed at the end of the month, when the S&P 500 wiped out half its monthly performance on the back of disappointing results from the Super 7s, as well as the announcement that the Fed had no plans to cut rates before its May meeting. Significant underperformance by high-beta and value stocks. Growth and quality stocks, as well as the technology and healthcare sectors, outperformed. The main positive contributors were STRYKER, ELI LILLY, ASML, DAIICHI SANKYO & ARISTA. The main detractors were WEG SA, INFINEON, SAMSUNG SDI, HANNON ARMSTRONG & CHART. Positions in BONDUELLE and SCA were sold, MEYER BURGER was replaced by NVIDIA, of better quality. A position in AMERICAN TOWER, a structural growth and defensive portfolio, was initiated. The balanced and resilient profile was maintained.
