Warning

You are about to buy a product that is not simple and can be difficult to understand.

What is this product?

Type | Subfund of a SICAV (open-end investment company) governed by French law. Each shareholder has co-ownership rights on the SICAV's net assets in proportion to the number of shares held.

A.M.F. classification | International equities

Term | The Fund was created on 26/04/2013 and its expected term is 99 years. This term may be extended or the Fund can be dissolved early on the initiative of its Board of Directors. The terms and conditions for extension or dissolution are described in more detail in the articles of association of the SICAV. The Fund has no maturity date.

Objectives | Echiquier World Next Leaders is a UCITS with the "International equities" classification managed in a dynamic and discretionary manner through stock-picking on international equity markets and more specifically in companies considered by the management team to be innovative and emerging global leaders (high growth potential) in traditional or burgeoning sectors.

The objective of the UCITS is to deliver over the recommended investment period a performance net of fees greater than that of its benchmark, the MSCI All Country Index Net Return (Euro) net dividends reinvested. However, it is not the subfund's objective to reproduce the performance of this index, and the portfolio's composition may therefore differ substantially from that of the benchmark index.

The UCITS implements an active and discretionary management based on a rigorous stock picking process, involving direct meetings with the companies in which the subfund invests.

The investment strategy seeks to select stocks which, according to the analysis conducted by the management company, offer the best current or potential growth, and have the criteria to be tomorrow's leaders in their area, in all regions of the world and all sectors. At all times, a minimum of 75% of the net assets of Echiquier World Next Leaders will be invested in listed equities, with a maximum of 50% in emerging-market equities. These will mainly be stocks whose market capitalisation is below 20 bn euros. The subfund will however also be able to invest in small-cap stocks with a market capitalisation of less than 500 mn euros up to a limit of 10% of its net assets.

Compliance with the market capitalisation criterion is assessed at the time of the initial investment in the equities in question.

The exposure to the equity risk will be at least 60%, of which a maximum of 50% to emerging markets.

The UCITS reserves the right to invest a maximum of 25% in fixed-income products. At the time of acquisition and for monitoring purposes over the life of

the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Échiquier and using the ratings produced by agencies. Eligible securities are deemed investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Derivative instruments, whether or not traded on regulated markets or over the counter, can be used on a discretionary basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;
- Occasionally expose the portfolio to equity risk during significant subscription transactions. The subfund does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

Furthermore, the portfolio management team systematically includes an extra-financial approach in building the portfolio, although extra-financial criteria are not a determining factor in investment decisions.

Cut-off time for centralising subscription/redemption orders | The investor may obtain a redemption on request every business day. Redemption requests are centralised each market trading day before 12 p.m. (Paris time) with our centralising agent BNP Paribas SA and executed on the net asset value calculated on the closing price on the day they are centralised.

Valuation frequency | The net asset value is calculated daily except on days when the Paris stock exchange is closed and on French public holidays.

Intended retail investor | Potential investors are aware of the risks inherent in holding this type of product and have an investment horizon corresponding to its recommended investment period. This fund may not be suitable for investors who plan to withdraw their money before 5 years. The fund is available to US Persons (more information can be found in the prospectus).

Depositary | BNP Paribas SA

The prospectus, the annual reports and the most recent interim documents, as well as any other practical information, and in particular where to find the most recent price of the shares are available on our website www.lfde.com or upon simple written request, free of charge, at: La Financière de l'Échiquier 53 avenue d'Iéna, 75116 Paris.

What are the risks and what could I get in return?

Risk indicator

The risk indicator is based on the assumption that you hold the shares for 5 years.

 The real risk can be very different if you opt for an exit before this period, and you could get less in return.

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified the product in risk class 6 out of 7, which is a high risk class. In other words, the potential losses linked to the product's future results are high and, should the situation deteriorate on the financial markets, it is a highly probability that our ability to pay you will be affected.

Risks materially relevant and not taken into account in the indicator: Credit risk.

As this product does not provide protection against market fluctuations, you may lose some or all of your investment.

Performance scenarios I

The figures shown include all costs of the product itself, including the portion paid to your advisor or distributor by La Financière de l'Échiquier. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

What you will get from this product depends on future market performance. Future market trends may change and cannot be predicted precisely. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. Markets could move very differently in the future.

What happens if La Financière de l'Échiquier is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the management company. In the event of failure of the latter, the assets of the product held in custody by the depositary will not be affected. In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. These amounts depend on the amount you invest, the time you hold the product, and the product's return. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%). That for other holding periods, the product changes as indicated in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	€488	€2,267
Impact of annual costs (*)	4.94%	3.11% each year

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 14.89% before costs and 11.78% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.

Composition of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay when you enter the investment. This is the maximum amount you will pay. The person selling the product will inform you of the actual costs.	EUR 300
Exit costs	We will not charge an exit cost for this product, but the person who sells the product can do so.	EUR 0
Recurring costs charged each year		
Management fees and other administrative and operating expenses	1.67% of the value of your investment per year. This estimate is based on actual costs over the past year.	EUR 162
Transaction costs	0.26% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies according to the quantity we buy and sell.	EUR 25
Incidental costs taken under specific conditions		
Performance fees and incentive fees	15% including taxes of the Fund's outperformance, net of fixed management fees, relative to its benchmark index, provided the Fund's performance is positive and once the underperformance of the last 5 years has been fully compensated for. The performance fee is crystallised every year on 31 March. The real amount varies depending on the performance of your investment. The total cost estimate includes the average over the past 5 years.	EUR 1

How long should I hold it and can I take money out early?
