Warning

You are about to buy a product that is not simple and can be difficult to understand.

What is this product?

TYPE | Subfund of a SICAV (open-end investment company) governed by Luxembourg law. Each shareholder has co-ownership rights on the SICAV's net assets in proportion to the number of shares held.

TERM | The fund was created on 15/12/2022 for an unlimited term.

OBJECTIVES | The Echiquier Go Local subfund is a dynamic subfund seeking long-term performance through exposure to international equity markets, more specifically in companies working to promote the local economy.

The MSCI All Country World Index can be used as an ex-post benchmark for its performance. This index is used solely for information purposes and is calculated in euros, dividends reinvested, by MSCI. It includes 50 countries, including developed and emerging countries. Investors are advised that the portfolio's composition may differ from that of the benchmark index.

The UCITS implements active and discretionary management based on a rigorous stock-picking process. The subfund invests in companies that aim to empower their region by buying or producing locally, by repatriating a business activity to a region close to its consumer market, or by facilitating these business activities by contributing innovative solutions or adapted infrastructures. The activity sectors favoured by the management team will be technology, industry, healthcare and food.

The subfund is exposed at least 60% to the international equity market with an exposure to emerging countries capped at 30% of its net assets. The subfund's assets mainly consist of large cap equities (more than €10 billion). However, the subfund reserves the right to invest up to 20% of its net assets in small caps (less than €1 billion) and up to 40% of its net assets in mid caps (between €1 billion and €10 billion).

The subfund reserves the right to invest up to 40% in fixed-income products. At the time of acquisition and for monitoring purposes over the life of the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Echiquier and using the ratings produced by agencies. The eligible securities in question are deemed to be investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Forward financial instruments, whether traded on regulated markets or over the counter, can be used to:

- Hedge the portfolio against currency risk and, to a lesser extent, against equity risk when the manager foresees a significant decline in the performance of the markets;
- Occasionally expose the portfolio to equity risk during periods of high subscription. The subfund shall in no event implement a strategy of over-exposing the portfolio to equity risk.

Furthermore, the portfolio management team systematically includes an extra-financial approach in building the portfolio, although extra-financial criteria are not a determining factor in investment decisions.

What are the risks and what could I get in return?

Risk indicator

The risk indicator is based on the assumption that you hold the shares for 5 years.

 The real risk can be very different if you opt for an exit before this period, and you could get less in return.

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood that this product will incur losses in the event of market movements or if we are unable to pay you.

We have classified the product in risk class 4 out of 7, which is a medium risk class. In other words, the potential losses related to the product's future results are at a medium level and, if the situation deteriorates on the financial markets, it is possible that our ability to pay you will be affected.

Risks materially relevant and not taken into account in the indicator: Credit risk.

As this product does not provide protection against market fluctuations, you may lose some or all of your investment.

Performance scenarios I

The figures shown include all costs of the product itself, including the portion paid to your advisor or distributor by La Financière de l'Échiquier. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

What you will get from this product depends on future market performance. Future market trends may change and cannot be predicted precisely. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. What happens if La Financière de l'Échiquier is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the management company. In the event of failure of the latter, the assets of the product held in custody by the depositary will not be affected. In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. These amounts depend on the amount you invest, the time you hold the product, and the product's return. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%). That for other holding periods, the product changes as indicated in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	€ 483	€ 1,573
Impact of annual costs (*)	4.88%	2.50% each year

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 10.15% before costs and 7.65% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.

Composition of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay when you enter the investment. This is the maximum amount you will pay. The person selling the product will inform you of the actual costs.	EUR 300
Exit costs	We will not charge an exit cost for this product, but the person who sells the product can do so.	EUR 0
Recurring costs charged each year		
Management fees and other administrative and operating expenses	1.70% of the value of your investment per year. This estimate is based on actual costs over the past year.	EUR 165
Transaction costs	0.18% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies according to the quantity we buy and sell.	EUR 18
Incidental costs taken under specific conditions		
Performance fees and incentive fees	15% including taxes of the Fund's outperformance, net of fixed management fees, relative to its benchmark index, provided the Fund's performance is positive and once the underperformance of the last 5 years has been fully compensated for. The performance fee is crystallised every year on 30 September. The real amount varies depending on the performance of your investment. The total cost estimate includes the average over the past 5 years.	EUR 0

How long should I hold it and can I take money out early?
