Warning

You are about to buy a product that is not simple and can be difficult to understand.

What is this product?

Type | Subfund of a SICAV (open-end investment company) governed by French law. Each shareholder has co-ownership rights on the SICAV's net assets in proportion to the number of shares held.

Term | The Fund was created on 29/11/1991 and its expected term is 99 years. This term may be extended or the Fund can be dissolved early on the initiative of its Board of Directors. The terms and conditions for extension or dissolution are described in more detail in the articles of association of the SICAV. The Fund has no maturity date.

Objectives | Echiquier Agressor is a dynamic subfund seeking to outperform its benchmark index MSCI Europe over an investment period of over 5 years through exposure to European equity markets.

The MSCI EUROPE Index (Bloomberg ticker MSDEE15N) is a representative indicator for the management of Echiquier Agressor. This index is representative of trends on equity markets of Europe's most developed countries. It is calculated in euros, with dividends reinvested. Investors are advised that the portfolio's composition may differ from that of the benchmark index.

The UCITS implements active and discretionary management based on rigorous stock picking obtained through the implementation of a process that involves direct contact with the companies in which the UCITS invests as well as short-term trading operations based on market opportunities.

Between 60% and 100% of the net assets of Echiquier Agressor is exposed to equity risk. The UCITS is exposed to equities of all market capitalisations (with a limit of 20% on small caps) and in any sector. In order to allow the subfund to be eligible for the PEA, at least 75% of the subfund is invested in assets eligible for the PEA. The UCITS reserves the right to invest up to 25% in fixed-income products. No limits have been set for the proportion of bonds of sovereign and private issuers in the portfolio.

At the time of acquisition and for monitoring purposes over the life of the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Échiquier and not mechanically and exclusively according to the ratings produced by agencies. Eligible securities are deemed investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Financial derivative instruments, both traded on regulated markets or over the counter, can be used on an exceptional basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;
- Occasionally expose the portfolio to equity risk during significant subscription transactions. The UCITS does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

These transactions shall be limited to 100% of the subfund's assets.

Furthermore, the portfolio management team systematically includes an extra-financial approach in building the portfolio, although extra-financial criteria are not a determining factor in investment decisions.

What are the risks and what could I get in return?

Risk indicator

The risk indicator is based on the assumption that you hold the shares for 5 years.

The real risk can be very different if you opt for an exit before this period, and you could get less in return.

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood that this product will incur losses in the event of market movements or if we are unable to pay you.

We have classified the product in risk class 4 out of 7, which is a medium risk class. In other words, the potential losses related to the product's future results are at a medium level and, if the situation deteriorates on the financial markets, it is possible that our ability to pay you will be affected.

Risks materially relevant and not taken into account in the indicator:
Credit risk.

As this product does not provide protection against market fluctuations, you may lose some or all of your investment.

Performance scenarios I

The figures shown include all costs of the product itself, including the portion paid to your advisor or distributor by La Financière de l'Échiquier. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

What you will get from this product depends on future market performance. Future market trends may change and cannot be predicted precisely. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. Markets could move very differently in the future.

What happens if La Financière de l'Échiquier is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the management company. In the event of failure of the latter, the assets of the product held in custody by the depositary will not be affected. In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. These amounts depend on the amount you invest, the time you hold the product, and the product's return. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%). That for other holding periods, the product changes as indicated in the moderate scenario.
- EUR 10,000 is invested.

| | If you exit after 1 year | If you exit after 5 years (Recommended holding period) |
|-----------------------------------|-----------------------------|---|
| Total costs | € 574 | € 1,838 |
| Impact of annual costs (*) | 5.82% | 3.73% each year |

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 1.87% before costs and -1.87% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.

Composition of costs:

| One-off costs at entry or exit | | If you exit after 1 year |
|---|--|--------------------------|
| Entry costs | 3.00% of the amount you pay when you enter the investment. This is the maximum amount you will pay. The person selling the product will inform you of the actual costs. | EUR 300 |
| Exit costs | We will not charge an exit cost for this product, but the person who sells the product can do so. | EUR 0 |
| Recurring costs charged each year | | |
| Management fees and other administrative and operating expenses | 2.26% of the value of your investment per year. This estimate is based on actual costs over the past year. | EUR 219 |
| Transaction costs | 0.56% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies according to the quantity we buy and sell. | EUR 55 |
| Incidental costs taken under specific conditions | | |
| Performance fees and incentive fees | 15% including taxes of the Fund's outperformance, net of fixed management fees, relative to its benchmark index, provided the Fund's performance is positive and once the underperformance of the last 5 years has been fully compensated for. The performance fee is crystallised every year on 31 March. The real amount varies depending on the performance of your investment. The total cost estimate includes the average over the past 5 years. | EUR 0 |

How long should I hold it and can I take money out early?

Recommended holding period: at least 5 years due to the nature of the assets underlying this investment.

Holding for a period shorter than the recommended holding period may not be in the investor's best interests.

You can request redemption of your shares on a daily basis. Redemptions are executed on a daily basis.
