Warning

You are about to buy a product that is not simple and can be difficult to understand.

What is this product?

Type | Subfund of a SICAV (open-end investment company) governed by French law. Each shareholder has co-ownership rights on the SICAV's net assets in proportion to the number of shares held.

Term | The Fund was created on 12/10/2006 and its expected term is 99 years. This term may be extended or the Fund can be dissolved early on the initiative of its Board of Directors. The terms and conditions for extension or dissolution are described in more detail in the articles of association of the SICAV. The Fund has no maturity date.

Objectives | Echiquier Convexité SRI Europe implements active management of European convertible bonds to achieve an annual performance net of fees greater than that of the benchmark "Refinitiv Europe Focus Hedged Index".

The "Refinitiv Europe Focus Hedged Index" is a representative indicator for the management of Echiquier Convexité SRI Europe. This index, used solely for information purposes, is calculated in euros, coupon reinvested, and is hedged against currency risk. Investors are advised that the portfolio's composition may differ from that of the benchmark index.

The UCITS' investment objective is associated with non-financial criteria - specifically environmental, social, and governance (ESG) criteria - such as the issuer's environmental policy, employee protection and expertise of the Management team, in accordance with a dual ESG Best in Universe and Best Effort approach.

Between 60% and 100% of Echiquier Convexité SRI Europe is invested at all times in European convertible bonds and equivalent securities. The Fund emphasises investment in mixed convertible bonds, as they have a risk/return profile that seeks to benefit from rising equities while benefiting from the effect of the bond component of the security to mitigate the impact of a decline. In order to determine the best medium-term and long-term investment opportunities, the management team focuses its analysis on various macroeconomic and microeconomic factors, on a fundamental and quantitative analysis of the underlying equities, a fundamental analysis of the credit of the issuers as well as a technical and quantitative analysis of certain convexity instruments (options, convertible options, etc.). Since this assessment by the managers of the credit risk associated with each issuer is an integral part of the management process, the UCITS does not set any particular limits in terms of external ratings. Investments in unrated or high-yield securities (speculative, riskier securities) may thus represent up to 100% of the UCITS's assets. Geographical allocations among the various markets are at the manager's discretion. A maximum of 20% of the UCITS's assets is exposed to other OECD countries (excluding EU, EFTA, and the United Kingdom).

In certain specific or technical cases (pending investment, bonds converted into equities, replication of the risk profile of a convertible, etc.), up to 10% of the portfolio may be invested in European equities. In most cases, direct investment in equities is incidental. In constructing the portfolio and assessing extra-financial criteria, the management team selects stocks according to an internal ESG rating methodology, after applying a sector exclusion filter. This approach may have certain methodological limits detailed in the prospectus. In addition, for more detailed information on the extra-financial rating methodology used for the UCITS and its limits, investors should refer to the Transparency Code of La Financière de l'Échiquier available on www.lfde.com.

Managers may invest up to 10% of assets in UCITS units or shares when they consider that such an investment serves the management strategy or when it is used to achieve a return on cash holdings. Derivatives may be used to address various kinds of portfolio risk: currency, equity, interest rate, and credit (in this specific case: only to buy single-name or index-based CDS protection).

What are the risks and what could I get in return?

Risk indicator

The risk indicator is based on the assumption that you hold the shares for 2 years.

 The real risk can be very different if you opt for an exit before this period, and you could get less in return.

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood that this product will incur losses in the event of market movements or if we are unable to pay you.

We have classified the product in risk class 3 out of 7, which is a low to medium risk class. In other words, the potential losses linked to the product's future results are low to medium and, if the situation deteriorates in the financial markets, it is unlikely that our ability to pay you will be affected.

Risks materially relevant and not taken into account in the indicator: Credit risk, Counterparty risk.

As this product does not provide protection against market fluctuations, you may lose some or all of your investment.

Performance scenarios I

The figures shown include all costs of the product itself, including the portion paid to your advisor or distributor by La Financière de l'Échiquier. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

What you will get from this product depends on future market performance. Future market trends may change and cannot be predicted precisely. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. What happens if La Financière de l'Échiquier is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the management company. In the event of failure of the latter, the assets of the product held in custody by the depositary will not be affected. In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. These amounts depend on the amount you invest, the time you hold the product, and the product's return. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%). That for other holding periods, the product changes as indicated in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 2 years (Recommended holding period)
Total costs	€ 513	€ 687
Impact of annual costs (*)	5.20%	3.48% each year

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 3.42% before costs and -0.06% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.

Composition of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay when you enter the investment. This is the maximum amount you will pay. The person selling the product will inform you of the actual costs.	EUR 300
