What is this product?

Type | Undertaking for Collective Investment in Transferable Securities - Société d'Investissement à Capital Variable (SICAV), incorporated in France.

Term | The life of the product is 99 years. This term may be extended or the Fund can be dissolved early on the initiative of its Board of Directors. The terms and conditions for extension or dissolution are described in more detail in the articles of association of the SICAV.

Objectives | DPE I Dynamique is a diversified and flexible sub-fund with the objective to outperform the following index: MSCI World Index Net Total Return, over the recommended investment period, mainly through exposure to international equities.

No benchmark exists that exactly reflects the investment objective of the UCITS. However, the closest index is the MSCI World Index Net Total Return, calculated in euros. Given that the UCITS neither tracks nor is benchmarked to an index, the World Index Net Total Return is only used as an indicator for ex-post performance comparison.

Investments are primarily made through subscriptions to UCIs, but the sub-fund may invest up to 30% of its net assets directly in equities. Direct investment in securities will be subject to a fundamental analysis process for each company.

The managers select the UCIs based on a comprehensive analysis of their investment process and risk. The selection is thus made through a combination of a quantitative approach (for judging the performance and regularity of the UCI) and a qualitative approach (analysis of fundamental criteria such as the management process, the risk monitoring system, etc.).

The subfund may also use index tracker funds or ETFs.

Lastly, the manager may use derivatives on equities or indices, currencies, medium- and long-term fixed income products, money market instruments or volatility.

Exposure to equities across all strategies linked to this asset class (through equities, UCIs or derivatives) may vary from 80% to 100% of net assets, including:

Exposure to small caps (€1 billion, directly or via funds that are mainly invested in this equity segment) can total up to 50% of assets.

Exposure to emerging countries (through investments in UCIs or directly-held securities) may amount to up to 50% of net assets.

Exposure to fixed income and money markets through all strategies linked to this asset class may vary between 0% and 20% of net assets, in particular:

Exposure to high yield or unrated securities can be up to 20% of net assets.

Exposure to subordinated bonds will not exceed a maximum of 20% of net assets.

Exposure to emerging countries may amount to a maximum of 20%.

Exposure to commodities will remain ancillary (10% maximum).

Exposure to emerging countries may amount to a maximum of 20%.

Exposure to commodities will remain ancillary (10% maximum).

Given the management implemented, the subfund may be exposed to currency risk up to 100% of its net assets.

Distributable sums allocation | Accumulation

Subscription/redemption procedures | Subscription and redemption orders are centralised daily at noon and executed at the net asset value calculated on the basis of the day's closing market prices. The net asset value is calculated daily with the exception of French public holidays and/or French markets closed (official calendar of Euronext Paris S.A.)

Targeted retail investors | This product is intended in particular for retail investors who (i) have basic knowledge and limited or no experience of investing in UCIs, (ii) want an investment consistent with the investment objective and the recommended holding period of the product, and (iii) are prepared to assume a medium level of risk on their initial capital. The conditions concerning accessibility of the product to US Persons are defined in the prospectus.

Depositary | BNP Paribas SA

What are the risks and what could I get in return?

Risk indicator

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to other products. It indicates the likelihood that the product will incur losses in the event of market movements or if we are unable to pay you.

We have classified this product in risk class 4 out of 7, which is a medium risk class. In other words, the potential losses related to the product's future results are at a medium level and, if the situation deteriorates on the markets, it is possible that the ability to pay you will be affected.

Performance scenarios I

The figures shown include all costs of the product itself as well as the fees due to your advisor or distributor.

The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product (and the benchmark where applicable) over the past 10 years.

The stress scenario shows what you could get in extreme market situations. Markets could move very differently in the future.

What happens if La Financière de l'Échiquier is unable to pay out?

The product is incorporated as a separate entity to the Management Company. In the event of failure of the Management Company, the assets of the product held by the custodian will not be affected.

In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. They depend on the amount you invest, the time you hold the product, and the product's return.

The synthetic risk indicator is based on the assumption that you hold the shares for the whole recommended investment period of five years.

The other materially relevant risks not taken into account in the calculation of the product's SRI are as follows:

- Credit risk
- Impact of techniques such as the use of derivatives

For more details regarding risks, please refer to the prospectus.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%);
- that for other holding periods, the product changes as indicated in the moderate scenario;
- that EUR 10,000 is invested in the first year.
