## ECHIQUIER WORLD NEXT LEADERS - F share (ISIN: FR0013423365)

### Subfund of the Echiquier mutual fund (SICAV) managed by La Financière de l'Echiquier

#### Objectives and investment policy

Echiquier World Next Leaders is a UCITS with the "International equities" classification managed in a dynamic and discretionary manner through stock-picking on international equity markets and more specifically in companies considered by the management team to be innovative and emerging global leaders (high growth potential) in traditional or burgeoning sectors.

The objective of the UCITS is to deliver over the recommended investment period a performance net of fees greater than that of its benchmark, the MSCI All Country Index Net Return (Euro) net dividends reinvested. However, it is not the subfund's objective to reproduce the performance of this index, and the portfolio's composition may therefore differ substantially from that of the benchmark index.

The UCITS implements an active and discretionary management based on a rigorous stock picking process, involving direct meetings with the companies in which the subfund invests.

The investment strategy is intended to select stocks which, according to the analysis conducted by the management company, provide the best current or potential growth, and have the criteria to be tomorrow's leaders in their area, in all regions of the world and all sectors.

At all times, a minimum of 75% of the net assets of Echiquier World Next Leaders will be invested in listed equities, with a maximum of 50% in emerging-market equities. These will mainly be stocks whose market capitalisation is below 20 bn euros. The subfund will however also be able to invest in small-cap stocks with a market capitalisation of less than 500 mn euros up to a limit of 10% of its net assets.

Compliance with the market capitalisation criterion is assessed at the time of the initial investment in the equities in question.

The exposure to the equity risk will be at least 60%, of which a maximum of 50% to emerging markets.

The UCITS reserves the right to invest a maximum of 25% in fixed-income products. At the time of acquisition and for monitoring purposes

over the life of the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Echiquier and using the ratings produced by agencies. Eligible securities are deemed investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Derivative instruments, both traded on regulated markets or over the counter, can be used on a discretionary basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;

- Occasionally expose the portfolio to equity risk during significant subscription transactions. The sub-fund does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

Furthermore, the portfolio management team systematically includes an extra-financial approach in building the portfolio, although extra-financial criteria are not a determining factor in investment decisions.

**Recommended investment period:** This fund may not be suitable for investors who plan to withdraw their money within 5 years.

**Allocation of income:** Accumulation.

**Deadline for centralising subscription/redemption orders:** Investors can make a request for redemption every business day. Redemption requests are centralised each market trading day before 12 p.m. (Paris time) with our centralising agent BNP Paribas SA and executed on the net asset value calculated on the closing price on the day they are centralised.

**Frequency of valuation:** The net asset value is calculated daily, except for days when the Paris stock market is closed and on official French public holidays.

#### Risk and reward profile

This indicator represents the historical annual volatility of the UCITS over a 5-year period.

The UCITS's risk indicator reflects the exposure of its net assets to its investment universe.

Historical data such as that used to calculate the synthetic risk indicator may not provide a reliable indication of the future risk profile of the UCITS.

The risk category associated with this UCITS is not guaranteed and may change over time.

The lowest category does not mean "risk-free".

Significant risk(s) for the UCITS not included in this indicator:

**Credit risk:** Credit risk is the risk of an issuer's credit rating being downgraded or of it defaulting. The value of debt securities or bonds in which the Fund invests may fall, causing the Fund's net asset value to decline.

**Guarantee:** The capital initially invested is not guaranteed.

## Charges

The charges and fees are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
