## Key investor information

This document provides you with key investor information about this UCITS. It is not advertising material. The information it contains is required by law to help you understand the nature and the risks of investing in this UCITS. You are advised to read it so you can make an informed decision about whether to invest.

# Echiquier Agressor Fund G (EUR) – Sub-fund of ECHIQUIER Agressor FUND G

(ISIN: LU0969068625) – This SICAV is managed by Financière de l'Echiquier

## Objectives and investment policy

The key characteristics of the UCITS are as follows:

- This sub-fund is a feeder fund of the Echiquier Agressor fund ("Master fund"). It is fully invested at all times in Echiquier Agressor units of its master fund and in cash on an ancillary basis.
- Echiquier Agressor is a dynamic fund seeking long-term performance through exposure on European equity markets.
- The MSCI Europe Index is a representative indicator of the management objective of the Master Fund Echiquier Agressor. This index, which is used solely for information purposes, shows changes across all sectors and euro-denominated French equities. It is calculated in euros and dividends are reinvested.
- The master fund is managed through meticulous stock-picking based on a process that involves meeting directly with the companies in which the Fund invests, as well as short-term trading transactions in line with market opportunities.
- The master fund has an exposure of at least 60% to European equities, and up to 10% is invested in non-European equities. The fund is exposed to all capitalisation sizes from all sectors.
- Income received by the master fund is capitalised.

Other information:

- The master fund may invest up to 25% of its assets in fixed income products. Prior to purchase and for monitoring purposes over the life of securities, credit risk is appraised on the basis of research and analysis carried out in-house by La Financière de l'Echiquier and the scores awarded by rating agencies. The bonds concerned are investment grade, i.e. with a minimum rating of BBB- from Standard & Poor's or equivalent, or considered as such by the management team.
- Forward financial instruments traded on regulated or unregulated markets, or over-the-counter, may be used on occasion to:
  - hedge the portfolio against currency risk, as well as against equity risk where the manager expects a sharp drop in market performance;
  - expose the portfolio occasionally to equity risk at times of significant subscription volumes. The fund will never implement a strategy where the portfolio is overexposed to equity risk.
- Owing to its investment policy, the feeder UCITS returns are very similar to those of the master UCITS.
- This sub-fund may not be suitable for investors wishing to withdraw their investment within five years.
- You can redeem your investment on any business day simply by submitting a request. Redemption requests are centralised every stock market trading day before 10 a.m. by our centralising agent BNP Paribas Securities Services – Luxembourg Branch and carried out using the net asset value calculated on the basis of the closing price on the day the requests are centralised.

## Risk and reward profile

Lower risk							Higher risk
←							→
Potentially lower reward							Potentially higher reward
1	2	3	4	5	6	7	

This information is based on past results in terms of volatility. Historical data such as that used to calculate the synthetic indicator may not be a reliable indicator of the future risk profile of the UCITS. It is not certain that the risk and reward category shown will remain unchanged. The ranking of the UCITS is likely to change over time. The lowest risk category does not mean a risk-free investment.

➤ **With its investment in the Master Fund, your UCITS is currently at level 6** on the synthetic indicator owing to its discretionary management and its exposure to equity markets and European fixed-income products. This means that its historical weekly volatility over five years is in the 15-25% range. The UCITS does not offer a capital guarantee.

➤ **The UCITS may also be exposed to the following risks, which are not fully reflected in the risk indicator:**

**Credit risk:** up to 25% of the fund is exposed to money market instruments or bonds. Credit risk is the risk of a private issuer's credit rating being downgraded or of its defaulting. The value of debt securities or bonds in which the UCITS is invested may fall, causing the net asset value to decline.

For more information on the risks, please refer to the UCITS prospectus.
