ECHIQUIER AGENOR SRI MID CAP EUROPE FUND - K Share (ISIN: LU0969069359)

Subfund of the Echiquier Fund mutual fund (SICAV) managed by La Financière de l'Echiquier

Objectives and investment policy

Echiquier Agenor SRI Mid Cap Europe Fund is a dynamic sub-fund seeking long-term performance through exposure to European equity markets. The sub-fund's priority is to establish a position on the European leaders of tomorrow by investing in growth stocks.

The MSCI Europe Mid Cap index is a representative indicator of the management of the Echiquier Agenor Mid Cap Europe Fund. This index, used for information purposes only, represents the trend of all equities of European mid-cap companies. It is calculated in euros, with dividends reinvested. Investors are advised that the portfolio's composition may differ from that of the benchmark index.

The UCITS implements active and discretionary management based on a rigorous stock-picking process through an in-depth evaluation of the companies included in the portfolio.

The sub-fund has a minimum exposure to European equities of 50 % and a maximum exposure to non-European equities of 25%. The sub-fund is primarily exposed to European small and mid-cap stocks, i.e., those with a market capitalisation of less than €10 billion.

The sub-fund reserves the right to invest 25% maximum in interest rate products. At the time of acquisition and for monitoring purposes over the life of the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Echiquier and using the ratings produced by agencies. The eligible securities in question are deemed to be investment grade, i.e. having a minimum Standard &

Poor's rating of BBB- or equivalent or considered as such by the management team.

Financial derivative instruments, both traded on regulated markets or over the counter, can be used on an exceptional basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;
- Occasionally expose the portfolio to equity risk during significant subscription transactions. The sub-fund does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

Recommended investment period: This fund may not be suitable for investors who plan to withdraw their money within 5 years.

Allocation of income: Accumulation.

Deadline for centralising subscription/redemption orders: Investors can make a request for redemption every business day. Redemption requests are centralised each market trading day before 10 p.m. (Paris time) with our centralising agent BNP Paribas SA Luxembourg and executed on the net asset value calculated on the closing price on the day they are centralised.

Frequency of valuation: The net asset value is calculated daily, except for days when the Luxembourg stock market is closed and on official Luxembourg public holidays.

Risk and reward profile

This indicator represents the historical annual volatility of the UCITS over a 5-year period.

The UCITS's risk indicator reflects the exposure of its net assets to its investment universe.

Historical data such as that used to calculate the synthetic risk indicator may not provide a reliable indication of the future risk profile of the UCITS.

The risk category associated with this UCITS is not guaranteed and may change over time.

The lowest category does not mean "risk-free".

Significant risk(s) for the UCITS not included in this indicator:

Credit risk: Credit risk is the risk of an issuer's credit rating being downgraded or of it defaulting. The value of debt securities or bonds in which the Fund invests may fall, causing the Fund's net asset value to decline.

Guarantee: The capital initially invested is not guaranteed.
